

| Respondent status | Description |
|--------------------------|--|
| Unanswered | The initial status when a respondent is created in the system. |
| Started | The respondent started the survey. |
| Declined | The respondent declined to participate in the project by clicking on a "decline" link in an email invitation. |
| Early screenout | The respondent was screened out from the client survey. |
| Late screenout | The respondent was screened out from the client survey. |
| Complete | The respondent completed the client survey. |
| Quota full | The respondent was terminated from the client survey due to client side quotas. |
| Bounced | Email delivery of survey invitation failed. |
| Survey closed | The respondent tried to enter on an invitation that was no longer valid (selection/project closed). |
| Timed out | The respondent started a survey but never finished. Respondents are timed out 1 hour after they have started the survey. Respondents that got status Timed out, but decided to come back and finish the survey are allowed to finish and their respondent status gets updated. |
| Suspicious | The respondent that answered the survey in less than 1 min, i.e. "speeder". |
| Bad project token | The respondent came to a Cint end page without the correct project token. Project tokens are used for some projects to provide extra security against fraudulent respondents. |
| Possible duplicate | Respondent caught by the Cint Unique Respondent de-duplication function. |
| Fraudulent | The respondent was marked as a bad response based on feedback from the client. |
| Quality terminate | The respondent was terminated from the client survey based on client side quality controls. |
| Pre-screen started | The respondent started a pre screener survey. The respondent has not started the client survey yet. |
| Pre-screen terminate | The respondent was terminated from a pre-screener survey. The respondent did not start the client survey. |
| Pre-screen timed out | The respondent timed out from a pre screener survey. |
| Profile terminated | The respondent was terminated based on panelist profiling before starting the client survey. |

| | |
|-----------------------|---|
| RelevantID Duplicate | The respondent was found to be a duplicate for the project based on Relevant ID fingerprint data. For more information, see http://www.imperium.com/relevantid.html |
| RelevantID Bad GeoIP | The respondent was found to not come from an acceptable country for the Target Group, based on Relevant ID Geo-IP data. |
| RelevantID Fraudulent | The respondent's "fraud profile score" was found to be higher than the acceptable threshold based on Relevant ID fraud profile data. |
| RelevantID Failure | The call to the Relevant ID service timed out (10+ seconds response time) or returned incomplete data. |
| Bad GeoIP | The respondent was terminated due to Cint Geo IP validation. |
| Technical terminate | The respondent was terminated based on survey compatibility project settings, eg. device type (mobile, tablet, standard), Flash/webcam. |
| Unsubscribed | The respondent was part of a selection, but unsubscribed from the panel without responding to the survey invitation. |
